Note:

In a live report, the estimated mileage is not the current mileage of the vehicle. Our system estimates average mileage by analysing data from similar vehicles registered in the same state. In this sample every value is shown as SAMPLE.

Title Records

SAMPLE. In a live report this panel lists every title record returned for the vehicle, including the issuing state, title date, title number status and any brand applied by the titling authority.

Accidents

SAMPLE. In a live report this panel confirms whether any accident has been reported to the national database by a state authority, together with the reported date and severity where available.

Junk / Salvage Records

SAMPLE. In a live report this panel shows any junk or salvage record filed by an insurance carrier, auto recycler or salvage yard, with the reporting entity and the date of the filing.

Total Loss Records

SAMPLE. In a live report this panel shows whether an insurance carrier has ever declared the vehicle a total loss, even when the titling state has not branded it salvage or junk.

Problem Checks

About This Sample

This document is published by Vehicle Check Report to show prospective customers the structure, section order and level of detail of a full vehicle history report before they order one. It is not a record of any vehicle. Every data field has been replaced with the word SAMPLE.

A real report is generated only after a valid 17 character VIN is submitted, and is compiled from national title and brand databases, insurance and salvage filings, manufacturer recall notices and published specification data. A vehicle history report is not a substitute for an independent physical inspection. Before buying a vehicle, you are strongly encouraged to also obtain an independent inspection so that hidden damage can be identified.

Vehicle Check Report does not guarantee the accuracy, availability or completeness of information supplied by third party sources, and information may change after the date a report is generated.

Coverage: 13 Countries

UNITED STATES & CANADA INCLUDED

Every report covers vehicles registered in any of the countries below.

Title and registration records, insurance and salvage filings, recall notices and import and export declarations are searched and combined into the one report you receive.

● United States

- Australia
- Netherlands
- Finland
- Malta

● Canada

- New Zealand
- Switzerland
- Estonia

● United Kingdom

- Ireland
- Poland
- Luxembourg

Vehicles that moved between countries are followed both ways.

A car first sold in one country and later imported into another still shows the history it built up before the move, in a single report.
